

Keep your little goblins safe this Halloween and prevent childhood deaths on the most dangerous day of the year for child pedestrians.

Carry a flashlight or glow stick to increase visibility to drivers.

Ensure a good fit for your child's costume and their shoes to prevent possible trips and falls.

Halloween Safety

Not tricky at all!

Wear light-colored, flame retardant costumes with reflective materials on them.

Children should wear face paint or headgear instead of a mask to ensure their vision is not restricted.

Walk with your child on sidewalks and cross at intersections or in crosswalks.

Public Health
Prevent. Promote. Protect.
